

Supplier status a buyer can check in one click

SupplierTrust Verified turns a record from a register your department designates into a signed, revocable badge on the supplier's website. A buyer checks it in one click and keeps a signed receipt for the file.

On the supplier's website
atlantic-robotics.example

Atlantic Robotics

VERIFIED

Source claim verified

Checked October 1, 2026 at 12:40 a.m. EDT

Listed in the demonstration supplier register

Valid until October 31, 2026

This does not establish contract award, general good standing or procurement eligibility.

Atlantic Robotics

REVOKED

Credential revoked

Attempted October 1, 2026 at 12:40 a.m. EDT

The issuer revoked this credential, so the badge no longer verifies.

Review this evidence

The prototype's badge. Atlantic Robotics is a fictional supplier; the issuer is a test issuer.

The problem today

- Buyers search public records or rely on screenshots and logos a supplier sends.
- TS13 asks for proof of contract award and good standing that buyers can verify without manual PSPC intervention.

What the test needs

- Your department confirms the permitted source and claim rules, and names a Technical Authority and source owner.
- No departmental system integration; no classified or Protected data.
- Claims come from the Open Government procurement data TS13 names for testing, and say only what that data shows.

A test with your department

Scope	One department; 10–20 suppliers and 10–20 buyers
Effort	60–90 minutes per participant in total; for the Technical Authority, a scoping session, two workshops and weekly check-ins
Setting	Canadian test environment, in English and French; public or test data
Funding	Paid by Innovative Solutions Canada, subject to approval
Measures	Check time, invalid cases caught, availability and accessibility
Timing	Indicative: scoping in weeks 1–4, setup in months 2–3, then the cohort; all within 12 months of contract award

Next step

Your department asks Innovative Solutions Canada for the test: email solutions@ised-isde.gc.ca or use its [Test an innovation form](#), and name SupplierTrust Verified, offer TS13-023685.
